

Ready to strengthen alignment between your IT organization and the business by improving financial visibility and optimizing demand planning?

Let ComSci show you how.

Every year, do your customers complain about their share of IT costs?

Do the business units feel the current IT cost allocation process is simply a "tax" they don't understand?

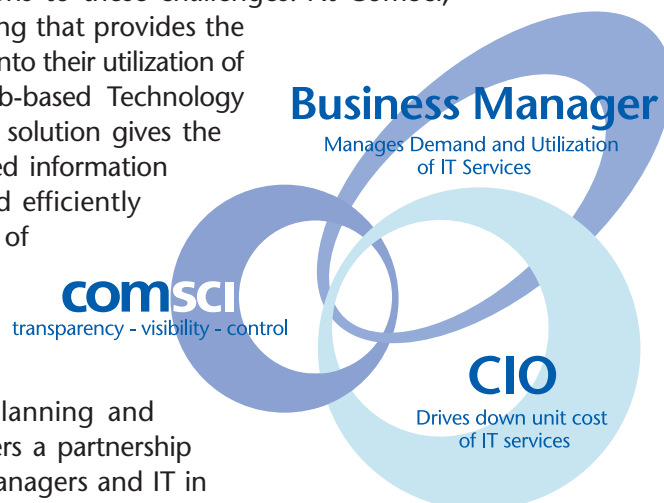

Does your current IT cost allocation process foster an IT Financial Governance partnership between IT and the business units?

Do your internal clients have the visibility into their consumption of IT services so they can control, manage and be accountable for their IT expenditures/expenses?

Such concerns are not uncommon.

As IT's role and the demands on capacity and unit costs have escalated, financial governance has become increasingly critical. And yet, many IT organizations are challenged to deliver the visibility and transparency business managers need in order to understand — and then optimize — IT utilization and spend.

Fortunately, there are solutions to these challenges. At ComSci, we deliver web-based reporting that provides the CIO and IT clients with a view into their utilization of technology services. Our web-based Technology Financial Management (TFM) solution gives the business managers the detailed information they need to understand and efficiently manage their consumption of IT services. With ComSci's solution, organizations have insight into IT expenses and can develop — and execute — an effective IT financial planning and governance process that fosters a partnership between the business-unit managers and IT in managing the overall IT investment.

Enhance visibility and transparency for all IT products and services

- » Mainframe Services
- » Distributed Computers
- » Software Development
- » Software Applications
- » Desktop
- » Network Services
- » Data Storage

- » Help Desk

WHY COMSCI?

Talk to our current clients and they'll tell you we're:

- **FOCUSED.** ComSci is 100% focused on management of technology transparency and chargebacks —helping clients with IT and/or telecommunications functions to improve the way they monitor, manage, and communicate technology costs.
- **RESPONSIVE.** ComSci stays focused on understanding and meeting our clients' needs. Designed to be flexible, our solutions can be easily adapted to meet each organization's specific requirements. In addition, we use a high-touch service delivery model that helps ensure consistently superior levels of client satisfaction.
- **TRUSTED.** Formerly known as Communication Sciences, ComSci has been in business since 1971. In 2005, we reinvigorated the company's portfolio of solutions to anticipate and meet our clients' evolving needs. We offer the stability of a proven entity with the entrepreneurial spirit of a start-up.

ABOUT COMSCI

ComSci delivers Technology Financial Management solutions that empower organizations to implement more effective IT financial governance. Through decades of experience and a suite of web-based tools, ComSci helps IT organizations enhance technology transparency and visibility, which in turn enables business units to understand and optimize demand and utilization of technology resources. ComSci is headquartered in Iselin, New Jersey, and was founded in 1971.

Through ComSci's TFM capabilities, IT can significantly enhance the way your organization plans, manages, and reports information technology, telecommunications and wireless costs to your internal clients. Our customizable solutions empower you to achieve better transparency by:

- » Streamlining systems and processes that support effective governance and security,
- » Gaining greater visibility into and control of all technology costs
- » Improving alignment between strategic objectives and technology spend
- » Allowing for an effective process for capacity planning and demand management

PROVEN PROCESSES, FLEXIBLE APPROACH

Although many organizations share similar IT financial governance challenges, each company has a unique structure and set of requirements. At ComSci, our solution:

- » Aggregates utilization information from existing applications and systems within your firm.
- » Is both flexible and scalable so you can either focus on providing transparency into specific IT products or services or all IT products and services
- » Utilizes a proven process for normalizing, pricing, and processing data of all types and from all sources.
- » Provides business managers with the visibility and transparency they need to understand how their businesses/departments are using technology, how technology is impacting their bottom line, and how they can better manage their consumption of IT services.

However you choose to focus our solutions, we can help you implement an effective process for providing technology transparency and chargeback through our web-based reporting — without placing additional demands on your in-house staff.

Ultimately, ComSci's solutions provide an efficient and effective means of delivering a clear and unified view of IT costs:

- » Empowering your organization to better align IT with the business
- » Deploying solutions tailored to each Business Units needs, and
- » Achieving unprecedented agility in cost-effectively anticipating and addressing ever-evolving business requirements.

YOUR NEXT STEP
