## ComSci's Enhanced Search adds power and flexibility to ComSci's Technology Financial Management (TFM) solution

### New Dashboard Metrics Track IT Costs and Expenditures at a Glance

**Edison, NJ, May 21, 2009** – ComSci, LLC, a leading provider of Technology Financial Management (TFM) solutions for IT cost transparency and chargeback, today announced numerous enhancements to its TFM solution, including new enhanced search and dashboard metrics capabilities for its BillBrowser™ module.

Through BillBrowser™, IT organizations can provide their business managers with visibility into their consumption of IT expenses so they can control, manage and be accountable for their expenses for anywhere in the world from anywhere in the world. ComSci's new enhanced search capabilities allow users to create custom ad-hoc queries on any data passed to ComSci. These enhanced search queries can be saved and shared with others throughout the organization.

"Clients tell us they are using the results from these enhanced search queries to learn more about the true costs of IT services in their organizations," said Michael Siniscalchi, Vice President of Business Development at ComSci. "This new knowledge is causing business users to rethink how those services fit within their business operations, promoting greater efficiency and saving money."

ComSci has also enhanced the Dashboard metrics functions in its TFM solution, providing clients with snapshot dashboard reporting into their expenditures. This enables business and IT executives and managers to monitor key expense indicators at a glance, drilling in to understand the detail behind what they see. Users can also customize their own individual, interactive reports and graphs, which can be easily saved, exported and emailed to others.

ComSci works continually to improve its products, largely based on client feedback and their ever changing business requirements. "We take special pride in the close working relationship we have with our clients," commented Siniscalchi. "By allowing our clients to guide our development priorities, ComSci delivers a stronger, more flexible solution with a compelling business value."

#### **About ComSci**

ComSci delivers Technology Financial Management solutions that empower organizations to implement more effective IT financial governance. Through decades of experience and a suite of web-based tools, ComSci helps IT organizations enhance technology transparency and visibility, which in turn enables business units to understand and optimize demand and utilization of technology resources. ComSci is headquartered in Edison, New Jersey, and was founded in 1971.
